Subject: Attributes for wizard based printer selection

Gentlepeople,

The primary/hard attributes I envision for activating Wizard Based Printer Selection are:

- Color or monochrome
- Number of pages (over a threshold selects faster printer)
- Number of pages (over a threshold selects duplex)
- Print quality (dots/inch)
- Media (overheads, oversized, or special paper)
- Archival (printer retains job for later copies)

The secondary/soft attributes would be:

- Location of printer (proximity to me or intended recipient)
- Printer queue length (how long would I need to wait)

Thank you for your time!
Doug Dunlap
